

The concept of this new sport is to travel between the trees at the top of the forest. This stroll at the top of the trees is done with the help of rope bridges, ladders, zip lines, climbing nets, foot bridges, swings, giant steps, Tarzan cords and many more games to cross.

## *Perfect for Leadership, P.E. or Student Council*

Equipped with a harness, you will evolve through different levels of courses in the trees adapted to one's age and strength in complete security. Your adventure will start with an obligatory initiation given by trained guides who will explain how to use your cords, carabiners and pulley, as well as, how to follow the rules of safety. This equipment will be connected along your stroll to a cable ensuring your safety.

**Equipment:** The equipment, which meets current safety standards, is provided on site (harness, gloves and carabiners). Comfortable clothing and appropriate footwear are recommended. To ensure safety, the activities are performed under the supervision of trained monitors.

### **Accessible and safe**

Although the ultimate aim is thrills, chills, and strong emotions, the entire gaming sites are designed for the utmost safety. Participants must be at least 69" (measured with arms up) to ensure that cables can be used without assistance.
